Female serial Killer Karla Homolka , who along with her ex husband Paul Bernardo kidnapped, raped and tortured girls is out of prison. She made a deal with the prosecution to testify against her husband in 1993, she claimed that he forced her to take part in the murders and rapes of school girls.. the prosecution made a deal that she would spend 12 years in prison for her part. SHE even raped and murdered her own sister and gave her sister as a Christmas present to Paul Bernardo. However once she signed the deal, it was final.. 12 years for her, Paul Bernardo got life.... after the trial the videotapes wer found and the police could not believe their eyes, Karla Homolak was shown as an active participant in the rapes and she was not a battered wife, yet she was just as guilty as Paul. However the courts could not break the deal, and all of Canada was outraged... she would only spend 12years, she is now released into the community and lives a very happy life with male model and porn star Luka Magnotta who also had an affair with his own step mother. They both were living in Montreal for a time and then moved to the Caribean together. How nice.

I just dont understand how she is able to walk the streets a free woman , have a baby ? marry a porn star ? move to the caribbean?? she even changed her name to Karla Teale , Teale being the SAME name her exhusband now uses and they got this name from the movie Criminal Law where the serial killer is named TEALE !! she has no remorse ?? and Luka Magnotta is just as sick as she is!

Jesus I saw some of the videos that she and Paul recorded during their torture settings. Quite disturbing to say the least.

I did a 3-part series for my show, on Canadian serial killers. Paul Bernardo and Karla Homolka were on the second episode. What's most disturbing about Karla Homolka is that when that video footage came out of her and Paul drugging up her own sister and then raping her, in the video footage she's clearly a willing participant in the rape, as she's the one that stole the drugs from the veterinarian hospital she worked at, and she was the one administering the drugs to her helpless sister. That sick

hospital she worked at, and she was the one administering the drugs to her helpless sister. That sick cunt got away with murder. Now that she's moved out of Canada, there's no way in hell Canada's justice system will be able to overthrow her previous conviction and find her guilty of the murder she's really guilty of.
